

TRẦN XUÂN BẮC

BACKEND .NET INTERN/FRESHER | SYSTEM ANALYST INTERN/FRESHER

Gia Binh, Bắc Ninh · Bxuan964@gmail.com · Portfolio · GitHub

CAREER OBJECTIVE

Information Technology student seeking a Backend .NET Intern/Fresher or System Analyst Intern/Fresher position. Looking to apply my experience in ASP.NET Core, databases, REST APIs, and system analysis to real-world software projects.

TECHNICAL SKILLS

Languages:	C#, Python, JavaScript, SQL, HTML/CSS
Backend:	C#, ASP.NET Core MVC/Web API, Entity Framework Core, RESTful API, ASP.NET Core Identity
Database:	SQL Server, PostgreSQL, MySQL, SQLite
Tools & Others:	Git, GitHub, Docker, Docker Compose, Postman, Bootstrap, jQuery, Gemini API

PROJECTS

WebBanHangOnline - Fashion E-commerce Website | Personal Project 2026

GitHub: <https://github.com/xuanbackhoaibu/WebBanHangOnline.git>

- Built a fashion e-commerce system using ASP.NET Core MVC, Entity Framework Core, SQL Server, Bootstrap, and jQuery.
- Developed product/category management, product variants, inventory, cart, wishlist, reviews, orders, and Admin/Customer flows with ASP.NET Core Identity.
- Developed REST APIs, payment flows (COD, VNPay, MoMo, VietQR), real-time chat with SignalR, and a Gemini-based product consultation chatbot.
- Analyzed and prepared system documentation including BRD, SRS, Use Case, ERD, API Specification, OpenAPI/Swagger, Postman, and API test cases.
- Containerized the application and SQL Server with Docker Compose, and prepared demo data for local deployment and testing.

Scant Reports - Data Upload and Report Export Web App (Self-developed Project) 2026

GitHub: <https://github.com/xuanbackhoaibu/scant.git>

- Developed a web app for user registration/login, CSV/XLSX upload, data processing, and report generation.
- Implemented admin/user roles, account management, password reset, audit log, health check, backup/restore, and deployment documentation.
- Supported exporting reports to HTML, summary CSV, DOCX, and PDF, with customizable HTML/Word report templates.
- Packaged the application with Docker and added unit tests for safer maintenance.

Student Performance - Data Mining Course Project 2026

GitHub: https://github.com/xuanbackhoaibu/student_performance.git

- Processed Student Performance data using Python, pandas, scikit-learn, mlxtend, matplotlib, and seaborn.
- Performed data cleaning, EDA, categorical encoding, scaling, stratified train/test split, Apriori association rules, and KMeans clustering.
- Built and evaluated classification models including Logistic Regression, Decision Tree, Random Forest, and LabelPropagation.

EDUCATION & CERTIFICATION

Dai Nam University - Bachelor of Information Technology

Hanoi, Vietnam | 2023 - 2026

English: Technical documentation reading proficiency
