

TRẦN XUÂN BẮC

BACKEND .NET INTERN

Gia Binh, Bắc Ninh · Bxuan964@gmail.com · Portfolio · GitHub

CAREER OBJECTIVE

Information Technology student pursuing a Backend .NET Developer internship, with hands-on experience in C#, ASP.NET Core MVC/Web API, Entity Framework Core, SQL Server database design, authentication/authorization, and Docker containerization. Seeking to contribute to scalable backend architectures and build reliable software solutions.

TECHNICAL SKILLS

Backend & Frameworks:	C#, ASP.NET Core MVC/Web API, Entity Framework Core, ASP.NET Core Identity, SignalR, RESTful APIs
Database:	SQL Server, PostgreSQL, MySQL, SQLite, Database Design, Indexing, EF Migrations, ERD
Languages:	C#, SQL, Python, JavaScript
Tools & DevOps:	Docker, Docker Compose, Git, GitHub, Swagger/OpenAPI, Postman
System Design:	MVC Architecture, Multi-tier Architecture, Requirement Analysis, BRD/SRS, Use Case

PROJECTS

WebBanHangOnline - Online Fashion E-commerce Website (ASP.NET Core) 2026

GitHub: <https://github.com/xuanbackhoaibu/WebBanHangOnline.git>

- Architected and built full e-commerce backend using ASP.NET Core MVC, EF Core, and SQL Server with seeded demo data.
- Implemented authentication & role-based authorization using ASP.NET Core Identity, securing admin management and customer checkout workflows.
- Developed RESTful APIs with Swagger/OpenAPI documentation for catalog search, admin analytics, order processing, and payment webhook integrations.
- Integrated payment gateways (VNPay, MoMo, VietQR, COD), SignalR realtime notification hub, and Gemini AI chatbot for product consultation.
- Containerized web application and SQL Server database with Docker Compose for consistent multi-container deployments.

Scant Reports - Data Processing and Report Generation Web Application 2026

GitHub: <https://github.com/xuanbackhoaibu/scant.git>

- Developed backend services in Python for secure file ingestion (CSV/XLSX), batch data parsing, and multi-format report generation (HTML, CSV, DOCX, PDF).
- Implemented user authentication, role-based access control, password reset workflows, audit logging, and automated backup/restore scripts.
- Containerized the application with Docker and wrote unit test suites to ensure reliable data processing.

Student Management System - Database & Backend Course Project 2024

GitHub: <https://github.com/xuanbackhoaibu/PROFILEE>

- Designed relational schema, implemented CRUD operations, stored procedures, and database constraints in SQL Server.

EDUCATION & CERTIFICATION

Dai Nam University - Bachelor of Information Technology

Hanoi, Vietnam | 2023 - 2026

English: Technical documentation reading proficiency
