

TRẦN XUÂN BẮC

BACKEND .NET INTERN/FRESHER | SYSTEM ANALYSIS

Gia Binh, Bắc Ninh · Bxuan964@gmail.com · Portfolio · GitHub

CAREER OBJECTIVE

Information Technology student seeking Backend .NET Intern/Fresher and System Analysis opportunities. Hands-on experience building ASP.NET Core MVC/Web API applications, SQL Server databases, authentication/authorization, REST APIs, reporting tools, Docker-based local demos, and system analysis documentation. Eager to contribute to real software projects while improving backend service design, requirement analysis, API quality, and documentation skills.

TECHNICAL SKILLS

Languages:	C#, Python, JavaScript, SQL
Backend:	C#, ASP.NET Core MVC/Web API, Entity Framework Core, RESTful API, ASP.NET Core Identity, SignalR, authentication/authorization
Database:	SQL Server, PostgreSQL, MySQL, SQLite, database design, ERD, EF migrations, relational schema design
Analysis & Testing:	Use Case, requirement analysis, API specification, Postman, API testing, workflow documentation
Tools & Others:	Git, GitHub, Docker, Docker Compose, Swagger/OpenAPI, Postman, Bootstrap, jQuery, pandas, scikit-learn, Gemini API

PROJECTS

WebBanHangOnline - Online Fashion E-commerce Website (ASP.NET Core, Solo Project) 2026

GitHub: <https://github.com/xuanbackhoaibu/WebBanHangOnline.git>

- Built an online fashion store using ASP.NET Core MVC, Razor Pages, Entity Framework Core, SQL Server, Bootstrap, and jQuery.
- Implemented product catalog, categories, product images, size/color variants, stock management, cart, wishlist, reviews, and order flow.
- Designed authentication and authorization with ASP.NET Core Identity, separating Admin and customer workflows.
- Developed admin features for managing products, users, orders, notifications, support requests, and basic reporting.
- Added public catalog APIs, admin analytics APIs, demo payment webhook, Swagger UI, OpenAPI documentation, and Postman collection for API testing.
- Prepared a System Analyst documentation pack including BRD, SRS, Use Cases, ERD, API Specification, and test cases.
- Integrated payment-related flows including COD, VNPay, MoMo, VietQR, plus SignalR chat hub and Gemini-based product consultation chatbot.
- Packaged the project with Docker Compose using container webthoitrang, SQL Server container webthoitrang-db, and seeded demo data/accounts.

Scant Reports - Data Upload and Report Export Web App (Self-developed Project) 2026

GitHub: <https://github.com/xuanbackhoaibu/scant.git>

- Developed a web app for user registration/login, CSV/XLSX upload, data processing, and report generation.
- Implemented admin/user roles, account management, password reset, audit log, health check, backup/restore, and deployment documentation.
- Supported exporting reports to HTML, summary CSV, DOCX, and PDF, with customizable HTML/Word report templates.
- Packaged the application with Docker and added unit tests for safer maintenance.

Student Performance - Data Mining Course Project 2026

GitHub: https://github.com/xuanbackhoaibu/student_performance.git

- Processed Student Performance data using Python, pandas, scikit-learn, mlxtend, matplotlib, and seaborn.
- Performed data cleaning, EDA, categorical encoding, scaling, stratified train/test split, Apriori association rules, and KMeans clustering.
- Built and evaluated classification models including Logistic Regression, Decision Tree, Random Forest, and LabelPropagation.

EDUCATION & CERTIFICATION

Dai Nam University - Bachelor of Information Technology

Hanoi, Vietnam | 2023 - 2026

English: Technical documentation reading proficiency
